Adeoti Nurudeen

Frontend Developer

Experience

Talkzat App
A text-to-speech web app

I built this app using th combination of HTML5, CSS3, Javascript, react, and the Google TTS API

Linkwarp
A URL shortener web app

I built the interface of this app with React jsx, HTML5, CSS BEM, and the Font Awesome Liibrary. I handled the interactivity using the elegant react hooks and I integrated an API to power the functionality.

DicIt
A full-functioning dictionary web app

I created this app with react, and styled it with CSS3, using the CSS preprocessor. I then powered its functionality with the open source dictionary API.

QR-Code Hatch
A free web app to generate custom QR codes

For simplicity, I structured this project with HTML5, and styed it using the combination of css3 and Bootstrap. I then handled the interactiveness with jQuery, and the functionality with a javascript library.

...and more

About Me

I'm Adeoti Nurudeen, a frontend developer with over 9 years experience in coding and design. Over the years, I've built a variety of web apps with priority on a great user experience (ux).

I'm highly comfortable transforming basic and complex designs and ideas into responsive, interactive, and beautiful websites and applications.

I find learning new stacks and tech tools joyful, and awesome; and it has well become my second nature.

- And **I'm open for frontend developer job offers!**

Skills

HTML5	Css3	JavaScript	React	Firebase
Material Ui	Photoshop	Git	Github	jQuery
Css Sass	Framer Motion	Bootstrap
