Adeoti Nurudeen

Frontend Developer

Experience

Q-Sales Inventory App

A web-based inventory application

I was hired to design the interface of the inventory application; from the main dashboard, to all various admin pages.

I used HTML5, CSS3, jQUERY, and Bootstrap.

ASDI International Site

The official website of a global organization

Back in 2021, I got hired as a freelancer to build the official website of this organization.

I built the site using WORDPRESS, CSS, and PHOTOSHOP

QR-Code Hatch

A free web app to generate custom QR codes

I built this open source web app that generates QR-Codes on the fly; without having to sign up or login.

I built the app with HTML, CSS, JQUERY, ETC.

Q-Sales Official Website

The official Website of Q-Sales

I got hired in 2022 to re-create a responsive website for Q-Sales Technology.

And I built it with REACT and SASS.

...and more

About Me

I'm Adeoti Nurudeen, a frontend developer with over 9 years experience in coding and design.

Over the years, I've built a variety of web apps with priority on great user experience (ux).

- I've built several functional and responsive websites and web apps
- I've worked with different APIs
- I learn new skills quickly
- I can blend with any work ethic

- And **I'm open for a frontend developer job offer!**

Skills

HTML5	Css3	JavaScript	React	Firebase
Tailwind CSS	Photoshop	Git	Typescript	jQuery
Css Sass	Framer Motion	Bootstrap	Wordpress
